COURSE DESCRIPTION

This course presents an in-depth discussion of the traditional functions, major laws and principles, and the cautions and contraindications of the major Acupuncture points. Students will learn the properties of the major points, including their traditional and empirical usages, the significance of their nomenclature, and their therapeutic effects. Students will also be exposed to the major groupings of the Acupuncture Points on the 12 Main Meridians, the Ren and Du Channels, and the Special point categories.

LEARNING OBJECTIVES

Upon completion of this course, the student will be able to describe traditional functions of all major points and identify major laws and principles of point energetics and grouping of the acupuncture points.
