
COURSE DESCRIPTION

Pathophysiology is a four-course series that presents the fundamentals of biophysiological processes as they relate to the development of diseases and their manifestations. Pathophysiology I is prerequisite to the remaining three courses in this series.

Pathophysiology I introduces the fundamentals of disease processes as they relate to cellular dynamics, inflammation and repair, fluid and electrolyte balance, acid/base and blood gas regulation, hemodynamics, and immunity. This material is then summarized into clinical relevancy through the consideration of the related symptoms.

LEARNING OBJECTIVES

Course Objective I : To develop a physiological understanding of disease processes.

Course Objective II: To develop an understanding of disease symptomatology and recognition.

COURSE PREREQUISITES

Anatomy & Physiology I-IV, Biology, Biochemistry, Western Medical Terminology

REQUIRED TEXTS

Pathophysiology, 5th Edition, by Carol Porth, Lippincott, 1996

RECOMMENDED TEXTS

Pathophysiology, 4th Edition, by Barbara Bullock, Lippincott, 1996

COURSE REQUIREMENTS

Out-of-Class Work

To successfully complete the program, students need to plan studying a minimum of 2 hours out-of-class for each academic in-class hour; and half an hour out-of-class for each hour of clinical training.

50%= Mid-Term Examination

50%=Final Examination

Classroom lectures represent the instructor's emphasis and focus on certain aspects of the course material. The student is responsible for the assigned readings.

GRADING SCALE: 100-90% A, 89-80% B, 79-70% C, 69% and below F

SPECIAL NOTES

Professionalism and Full and Prompt Attendance: To pass any course (separate from academic performance) all students must meet requirements for professionalism in coursework. Professionalism includes full and prompt attendance: Students who miss more than 2 class meetings in a 10-week course will earn an F in that course. Additionally, students who arrive more than 15 minutes to class or leave class before it ends will be marked tardy. Two tardies equal one absence. NOTE: Students who leave and return to class late from a break or leave during the class

(especially if this is repeated) or who disrupt the class in other ways may be referred to the Academic Dean for professionalism.

CLASS ONE (The syllabus is subject to change at the discretion of the instructor.)

Genetic control of cell function.

Genetic disorders

CLASS TWO

Cellular adaptation, injury, death, wound healing

CLASS THREE

Neoplasia, Hemostasis

CLASS FOUR

Alterations in red cells

CLASS FIVE

Mid- term Examination

Alterations in red cells (continued)

CLASS SIX

Disorders of white cells & lymphoid tissues.

Infectious diseases

CLASS SEVEN

Infectious diseases (continued)

Immunity

CLASS EIGHT

Immunity (continued)

Alterations in immune response

CLASS NINE

Acquired immunodeficiency syndrome

CLASS TEN

Alterations in skin function

CLASS ELEVEN

Final Examination

MTOM COURSE SYLLABUS
PATHOPHYSIOLOGY I

Nguyen, Thom
Spring 2018

Thom Nguyen worked as an acupuncturist and physician in Vietnam and the Ivory Coast of West Africa. Dr. Nguyen served as volunteer acupuncturist and board member at Nhan Hoa Medical Clinic in Garden Grove. Dr. Nguyen teaches a number of courses in the MTOM Program including coursework in the Pathophysiology series; he also trains MTOM clinic interns as a Supervisor in the Emperor's Clinic as well as at the externship site at UCLA's Arthur Ashe Student Health Center.
