
COURSE DESCRIPTION

This course provides an overview of the history of events and ideas that lead to the development of both Eastern and Western medical paradigms. It surveys the major impact of specific historical events as well as the individuals who contributed significantly to the medical advances and practices seen today.

LEARNING OBJECTIVES

This course consists of a survey of selected topics in the historical development of Oriental and Occidental medical sciences. The development of Oriental and Occidental paradigms are compared.

Upon completion of this course, the successful student will have a basic understanding of the historical development and practices of Oriental and Occidental medical sciences, and some of the historical events that impacted this development.

COURSE PREREQUISITES

Professionalism and Full and Prompt Attendance: To pass any course (separate from academic performance) all students must meet requirements for professionalism in coursework. Professionalism includes full and prompt attendance: Students who miss more than 2 class meetings in a 10-week course will earn an F in that course. Additionally, students who arrive more than 15 minutes to class or leave class before it ends will be marked tardy. Two tardies equal one absence. NOTE: Students who leave and return to class late from a break or leave during the class (especially if this is repeated) or who disrupt the class in other ways may be referred to the Academic Dean for professionalism.

CLASS ONE (The syllabus is subject to change at the discretion of the instructor.)
The Pre-Hàn and Early Hàn Period; the M_ā wángdūī manuscripts
